Junior Frontend Developer

PERSONAL STATEMENT

As Bachelor of Electrical Engineering and Computer Science I understand all transmission systems concerning the (mobile, wireless, optical and digital transmission medium as well as network access.

In addition, my second interests is web development and design, my free time I spend in designing, programming and making web pages. I really love this job, but i didnt have a chance to work for some company in order to spread my knowledge to become part of team and that's my dream to success.
